TECHNICAL SKILLS

- **Proficient:** HTML, CSS, Javascript, ReactJS, Ruby on Rails, PostgreSQL, Git, Tailwind CSS, NextJS, RestApi, Bootstrap, Typescript, NodeJS, ExpressJS, MongoDB
 - **Familiar:** Php, Material UI, SCSS, Axios, Appwrite, Supabase, Svelte, ShadCN, React TanstackQuery, Figma, C#, Razor.net
-

PROFESSIONAL EXPERIENCE

Media Communication Corp. | WFH

Front-end Website Developer

March 2024 - July 2025

- Collaborated with the team to enhance productivity and minimize bugs, resulting in a 25% increase in efficiency and timely completion.
 - Leveraged libraries such as handlebarsJS and GulpJS to achieve a 50% optimization of the website and produce cleaner code.
 - Optimized website for enhanced user experience and friendliness, achieving a performance improvement of 90% and up using GTmetrix tools.
-

PROJECT WORK

Document Management System | Developer | Repo | [Live](#)

2025

A full-stack application with MongoDB ExpressJS NodeJS and ReactJS (MERN) Technology, with a feature of Time tracker, Ticketing Support and HR Support Request, with admin access.

- React Router v6 was used to develop authentication and authorization routing, guaranteeing safe and convenient access for many departments. which resulted in a 20% reduction in load times, 40% improvement in routing performance, and simplified navigation and overall security by 35%.
- Use Typescript for data types and Shadcn to improve the user interface by 50%.
- Utilized TypeScript for robust data typing, improving code maintainability and reducing bugs, ultimately optimizing project efficiency by 25%.

E-Commerce Website | Developer | Repo | [Live](#)

2025

A full-stack application with Razor.Net for the backend and Vanilla Js for the frontend using JQuery, Where User, Can Order an Items Online and Paid Via Paypal or Debit Credit Card

- Converted Figma mockup designs into responsive, production-ready code using a mobile-first approach, ensuring pixel-perfect layouts across all devices with over 95% design accuracy.
- Optimized the website by maximizing the use of WebP images, minifying CSS and JavaScript, and automating tasks with Gulp.js—resulting in a lightweight build with a 90% performance score and under 3 seconds for both Time to Interactive (TTI) and Onload Time (OT) based on GTmetrix, PageSpeed Insights, and Lighthouse reports.
- Integrated Facebook Pixel, TikTok Pixel, Everflow, and CRMs like Konnektive and Sticky.io to enhance tracking, automate customer management, and boost marketing performance - resulting in a 40% increase in tracking accuracy and improved customer retention.

Snapgram App | Developer | [Repo](#) | [Live](#)

2024

A React typescript application where registered users are able to create a post, like a post, save post and follow a usercomment, share and follow send and receive messages and create channels.

- Utilized Tanstack Query for data fetching, caching and updating from Appwrite Backend as a Service, resulting in 15% faster load times
 - Integrating Zod library in typescript to boost type safety, simplifies data validation, and enhances developer experience, resulting in a roughly 25% improvement in code robustness and maintainability.
-

EDUCATION

Full Stack Web Development, *Avion School*

June 2023 - Feb 2024

B.S. in Industrial Technology, *Talisay City College*

2015 - 2019
